BACKGROUND AND INTERESTS

I am currently a senior research engineer at Nokia Bell Labs. Previously, I was a postdoctoral researcher at the University of Toronto, Canada. I hold a Ph.D. in Computer Science from the Ecole Normale Supérieure (ENS) of Lyon and the University of Lyon, France.

My research on distributed systems has been widely published in prestigious journals and conferences in the areas of networking and distributed systems, including but not limited to: the Journal of Network and Computer Applications, IEEE Transactions on Cloud Computing, as well as the International Conference on Service-Oriented Computing, the International Conference on Parallel Processing, IEEE ACM Symposium on Edge Computing and IEEE/ACM International Symposium in Cluster, Cloud, and Grid Computing. I am also an active member of the research community. I have served over 15 conferences and reviewed papers for top-tier journals such as IEEE Transactions on Cloud Computing, IEEE Transactions on Parallel and Distributed Systems, among others.

My research interests include distributed systems, machine/reinforcement/federated learning, edge/fog/cloud computing, big data analytics, Internet of Things, optimization, and scheduling and placement problems.
